1.1	01/10/2019	§1 & 2: typo correction (7.5.2.3 of LOC&PAS TSI) §2 2nd bullet point in 3rd paragraph: typo correction (MS B)

The purpose of this document is to provide applicants and other external stakeholders of the vehicle authorisation business with information in regards to the specific topic referenced in the title. The clarifications contained in this document may be integrated in the next revision of the guidelines for the practical arrangements for the vehicle authorisation process, without prejudice of the formal process foreseen for updating the guideline.

The present document is a non-legally binding guidance of the European Union Agency for Railways. It is without prejudice to the decision-making processes foreseen by the applicable EU legislation. Furthermore, a binding interpretation of EU law is the sole competence of the Court of Justice of the European Union.

1. Description of the issue

The article 21(13) of the Directive (EU) 2016/797 describes the process to follow for the extension of the area of use of a vehicle which has already been authorised. In particular, it specifies that there is a need to supplement the file with the relevant documents for the additional area of use. The process is further described in:

- Articles 14(1)(c), 30, 39 and 40 of the Regulation (EU) 2018/545;
- Clause 7.5.2.3 of the LOC&PAS TSI, and
- Clause 7.6.1 of the WAG TSI

However, in some cases an applicant does not want to extend the area of use, but to change it, meaning that there is no “additional” area of use as compared to the original one; instead, the vehicle will no longer operate in the original area of use, but only in the new area of use. In order to do so, it is often necessary to perform some changes in the vehicles, in order to make it compatible with the new area of use.

This case is not explicitly covered in the Directive (EU) 2016/797 nor in the Regulation (EU) 2018/545, and many applicants have doubts on what would be the correct application case, amongst the choices provided in article 14(1) of Regulation (EU) 2018/545.

2. Line to take

When an applicant wishes to change (rather than extend) the area of use of an already authorised vehicle from a Member State A to a Member State B, performing some changes in order to make the vehicle compatible with the area of use of Member State B, and the modified vehicle will not remain authorised in the Member State A, it should not be considered as an extension of the area of use.

The extension of the area of use pursuant to article 14(1)(c) of Regulation (EU) 2018/545 and to article 21(13) of Directive (EU) 2016/797 refers to extending the area of use of a vehicle that is already authorised. This is not the case in the described scenario: the modified vehicles are not authorised in Member State A, and in some cases, they cannot be authorised in Member State A, as after the changes necessary to make them compatible with the network in MS B they are no longer technically compatible with the network of Member State A.

The authorisation case should be a new authorisation following article 14(1)(d) of Regulation (E) 2018/545, although some of the concepts of the extension of the area of use pursuant to article 14(1)(c) of the Regulation are applicable as well:

- the technical compatibility with the network in Member State B needs to be assessed (as it would be the case of an extension of the area of use), and
- there is no need to apply for a new authorisation in Member State A (in case this would be technically possible), because the modified vehicles will not be operated there anymore.

Because the area of use of the modified vehicle will be limited to Member State B, the applicant can choose which entity can be the authorising entity: the Agency or the NSA

If the new area of use covers more than 1 Member State, then the applicant should apply to the Agency for a new authorisation pursuant to article 14(1)(d) of Regulation (E) 2018/545 with an area of use covering more than 1 MS.

The assessments to be performed should be limited to the changed parts (and the interfaces with the modified parts) and/or to the national rules for the new area of use (which in most cases should be related to technical compatibility with the network).

Please notice that in case of extension of the area of use of an already authorised vehicle, clause 7.5.2.3 of LOC&PAS TSI and clause 7.6.1 of WAG TSI apply. See also the line to take issued by the Agency with reference ERA1209/036 covering the applicability of the phase A as defined in the rolling stock TSIs in case of extension of the area of use of an already authorised vehicle.

3. Legal background

a) Directive (EU) 2016/797

- Article 4. Content of TSIs

[...]

2. Fixed subsystems shall comply with the TSIs and national rules in force at the time of the request for authorisation of placing in service in accordance with this Directive and without prejudice to point (f) of paragraph 3.

Vehicles shall comply with TSIs and national rules in force at the time of the request for authorisation of placing on the market in accordance with this Directive and without prejudice to point (f) of paragraph 3.

The conformity and compliance of fixed subsystems and vehicles shall be permanently maintained while they are in use.

- Article 21. Vehicle authorisation for placing on the market

“3. The application for a vehicle authorisation for placing on the market shall be accompanied by a file concerning the vehicle or vehicle type and including documentary evidence of:

(a) the placing on the market of the mobile subsystems of which the vehicle is composed in accordance with Article 20, on the basis of the ‘EC’ declaration of verification;

(b) the technical compatibility of the subsystems referred to in point (a) within the vehicle, established on the basis of the relevant TSIs, and where applicable, national rules;

(c) the safe integration of the subsystems referred to in point (a) within the vehicle, established on the basis of the relevant TSIs, and where applicable, national rules, and the CSMs referred to in Article 6 of Directive (EU) 2016/798;

(d) the technical compatibility of the vehicle with the network in the area of use referred to in paragraph 2, established on the basis of the relevant TSIs and, where applicable, national rules, registers of infrastructure and the CSM on risk assessment referred to in Article 6 of Directive (EU) 2016/798.

[...]

13. Where the applicant wishes to extend the area of use of a vehicle which has already been authorised, it shall supplement the file with the relevant documents referred to in paragraph 3 concerning the additional area of use. The applicant shall submit the file to the Agency, which shall, after following the procedures laid down in paragraphs 4 to 7, issue an updated authorisation covering the extended area of use.

If the applicant has received a vehicle authorisation in accordance with paragraph 8 and wishes to extend the area of use within that Member State, it shall supplement the file with the relevant documents referred to in paragraph 3 concerning the additional area of use. It shall submit the file to the national safety authority which shall, after following the procedures laid down in paragraph 8, issue an updated authorisation covering the extended area of use.

[...]”

b) *Commission Implementing Regulation (EU) 2019/776 Annex IV (amendments to the annex of Regulation (EU) No 1302/2014 LOC&PAS TSI)*

- 7.5.2.3. Rules for extension of area of use for existing rolling stock not covered by an EC declaration of verification

“Pursuant to Article 54(2) and (3) of Directive (EU) 2016/797, vehicles authorised for placing in service prior to 15 June 2016 shall receive an authorization for placing on the market according to Article 21 of Directive (EU) 2016/797 in order to operate on one or more networks which are not yet covered by their authorisation. Such vehicles shall thus be conform to this TSI or benefit from a non-application of this TSI pursuant to Article 7(1) of Directive 2016/797/EC.

In order to facilitate the free movement of vehicles, provisions shall be developed to set out which level of flexibility could be granted to such vehicles as well as to vehicles which were not subject to authorization, as regards compliance with the TSI requirements while fulfilling the essential requirements, maintaining the appropriate safety level, and where reasonably practicable, improving it.”

c) *Commission Implementing Regulation (EU) 2019/776 Annex I (amendments to the annex of Regulation (EU) No 321/2013 WAG TSI)*

- 7.6.1. Rules for extension of area of use for existing rolling stock not covered by an EC declaration of verification

“Pursuant to Article 54(2) and (3) of Directive (EU) 2016/797, vehicles authorised for placing in service prior to 15 June 2016 shall receive an authorization for placing on the market according to Article 21 of Directive (EU) 2016/797 in order to operate on one or more networks which are not yet covered by their authorisation. Such vehicles shall thus be conform to this TSI or benefit from a non-application of this TSI pursuant to Article 7(1) of Directive 2016/797/EC.

In order to facilitate the free movement of vehicles, provisions shall be developed to set out which level of flexibility could be granted to such vehicles as well as to vehicles which were not subject to authorization, as regards compliance with the TSI requirements while fulfilling the essential requirements, maintaining the appropriate safety level, and where reasonably practicable, improving it.”

d) *Regulation (EU) 2018/545*

- Article 14. Identification of the relevant authorisation

“1. The applicant shall identify and choose the relevant authorisation from the following cases:

[...]

(c) extended area of use: the vehicle type authorisation and/or the vehicle authorisation for placing on the market issued by the relevant authorising entity for an already authorised vehicle type and/or vehicle in order to extend the area of use without a change of the design, pursuant to in Article 21(13) of Directive (EU) 2016/797;

(d) new authorisation: the vehicle type authorisation and/or vehicle authorisation for placing on the market issued by the authorising entity after a change of an already authorised vehicle and/or vehicle type, pursuant to Articles 21(12) or 24(3) of Directive (EU) 2016/797;

[...]

3. *An applicant may combine:*
- (a) a request for new authorisation with a request for an authorisation for an extended area of use; or*
 - (b) a request for a first authorisation with a request for authorisation in conformity to type.*
- The timeframes set out in Article 34(1) and (2) shall apply to the combined application. Where appropriate, it may result in the issuing of several authorisation decisions by the authorising entity.”*
- **Article 30.** Application content and completeness
“[...]”

2. *For the authorisation extended area of use referred to in Article 14(1)(c), the following points shall apply:*

 - (a) the documentation to be added to the original full accompanying file for the decision issued in accordance with Article 46 by the applicant shall be limited to aspects concerning the relevant national rules and the technical compatibility between the vehicle and the network for the extended area of use;*
 - (b) when the original vehicle type authorisation included non-applications of TSIs, the applicant shall add the relevant decisions for non-application of TSIs in accordance with Article 7 of Directive (EU) 2016/797 covering the extended area of use to the original full accompanying file for the decision issued in accordance with Article 46;*
 - (c) in case of vehicles and/or vehicle types authorised under Directive 2008/57/EC or before, the information to be added by the applicant to the original file for the aspects covered by point (a) shall also include the applicable national rules.*
 - **Article 39.** The assessment of the application by the authorising entity
“[...]”

4. *The authorising entity shall check the completeness, relevance and consistency of the evidence from the applied methodology for requirements capture irrespective of the method used. For a new authorisation as specified in Article 14(1)(d) the assessment performed by the authorising entity shall be limited to the parts of the vehicle that are changed and their impacts on the unchanged parts of the vehicle. The checks to be performed by the authorising entity for an "extended area of use" authorisation as specified in Article 14(1)(c) shall be limited to the applicable national rules and to the technical compatibility between the vehicle and the network for the extended area of use. Checks already carried out at the previous authorisation shall not be repeated by the authorising entity.*

[...]”
 - **Article 40.** The assessment of the application by the concerned NSAs for the area of use
“[...]”

4. *The checks to be performed by the NSAs for the area of use for an extended area of use authorisation referred to in Article 14(1)(c) shall be limited to the applicable national rules and to the technical compatibility between the vehicle and the network for the extended area of use. Checks already carried out during the previous authorisation shall not be repeated by the NSAs for the area of use.*

[...]”

e) *Guidelines for the practical arrangements for the vehicle authorisation process (ERA-PRG-005/02-361 V1.0)*

- chapter 3.3.2.1 Article 14: Identification of the relevant authorisation

“[...]”

Coordination of authorisations - New authorisation combined with extended area of use

In the case of an extension of the area of use from one Member State to a second Member State combined with changes to the vehicle type and/ or vehicle where it is not the intention of the applicant to change the authorisation in the first Member State (e.g. because the changed vehicles will not be operated in the first Member State) or the holder of the vehicle type authorisation wishes to add a vehicle type variant to the vehicle type:

- *There is no need to request a new authorisation in the first Member State because the changes are only necessary for the second Member State; the vehicles that were already authorised in the first Member State will not be changed and will remain in conformity with the authorised vehicle type covering the first Member state;*
- *The applicant should apply (to the Agency or to the NSA of Member State 2) for the case of a new authorisation for a new vehicle type or a new vehicle type variant (only if the applicant is the holder of the vehicle type authorisation) covering the changes; and*
- *The area of use of the new vehicle type or the new vehicle type variant (only if the applicant is the holder of the vehicle type authorisation) will be limited to the second Member State.”*
